Abhijeet Kumar Singh   Abhijeet641

Summary

Enthusiastic and detail-oriented Software Engineer with hands-on experience in building scalable web applications, contributing to open-source projects, and participating in national-level hackathons. Adept in full-stack development, performance optimization, and collaborative agile workflows. Proven contributor to Google Summer of Code and impactful roles at early-stage startups.

Experience

Zenstreet.ai
Software Developer
REMOTE
MAY 2024-PRESENT

- Contributed to building reusable components and simplified UI logic to improve the maintainability of the front-end codebase.
- Collaborated with design and backend teams to implement scalable front-end architecture.
- Improved performance and reduced load times through effective code splitting and optimization.
- Helped improve page load speed by identifying unused CSS and simplifying component logic.
- Participated in weekly stand-ups and code reviews to maintain code quality and team alignment.

Education

CS50: Introduction to Computer Science | Harvard University
Computer Science
Course
Sept 2024- Jan 2025

Projects

SlotMachineGame
This is a simple text-based Slot Machine game built with JavaScript.

SecureMail UI Simulator

- Implemented search, dynamic filtering (Spam / Archived / Important), and role-based email visibility using React state and conditional rendering.
- Used TypeScript for strict typing and cleaner component structure.
